SUMMARY

Computer Science student and aspiring Software Developer with hands-on experience building responsive, client-focused websites using HTML5, CSS3, JavaScript, and Bootstrap. Experienced in developing portfolio websites, business websites, and landing pages with a focus on clean UI, mobile-first design, and performance optimization. Currently expanding programming skills through Python and Artificial Intelligence & Data Science studies while continuing to strengthen web development expertise. Passionate about modern web technologies and committed to writing clean, maintainable code.

PROFESSIONAL EXPERIENCE

Frontend Developer, *Freelancer.com*
06/2026 – Present | Remote
As a freelance web developer, I design and develop responsive and user-friendly websites tailored to client needs. My work includes creating portfolio sites, business websites, and landing pages using HTML5, CSS3, JavaScript and Bootstrap. I focus on clean design, optimized performance, and delivering projects on time while ensuring client satisfaction.
